

MAKER TERMICO SYNTH

Description

Synthetic fluid specially formulated for use as a heat transfer agent. Its additives make it extraordinarily thermal stability.

This fluid is specific for use in closed-circuit and forced-circulation heat transfer systems where working temperatures reach approximately 315 °C.

Properties

- High thermal stability.
- Longer service life than mineral oils.
- Wide range of working temperatures.
- Easy temperature control.
- Good heat transfer coefficient.
- Low vapour pressure.
- Low tendency to form carbonaceous waste.
- Less load loss due to its low viscosity.

Quality levels, approvals and recommendations

• ISO: 6743/12 - QC
